This report follows the disclosure obligations under National Instrument 81-106 Investment Fund Continuous Disclosure ("NI-81-106" or the "Instrument") and should be read in conjunction with the financial statements and notes thereto for the period ended December 31, 2013.

INVESTMENT OBJECTIVE AND STRATEGIES

The Company's objective is to invest in Class A Limited voting shares ("Brookfield shares") of Brookfield Asset Management Inc. ("Brookfield") which generate cash flow through dividend payments that fund quarterly fixed cumulative preferential dividends for the holders of the Company's senior preferred shares, and provide the holders of the Company's capital shares the opportunity to participate in any capital appreciation in the Brookfield shares. The Company's capital shares and preferred shares are also referred to collectively as units, with each unit consisting of one capital share and one preferred share ("unit").

INTERNATIONAL FINANCIAL REPORTING STANDARDS

The Company adopted International Reporting Standards ("IFRS") in 2014, and as a result, certain comparative balances have been restated to conform to current presentation. Please refer to Note 3 in the Company's Interim financial statements for a summary of the IFRS transition and the impact of IFRS on its financial reporting.

YEAR-END CHANGE

In the prior year, the Company changed its fiscal year end from September 30th to December 31st. This management report on fund performance has been prepared for the new interim period of January 1, 2014 to June 30, 2014. Comparative balances presented in the report as a result of the year-end change are in accordance with the requirements of NI 81-106.

RISKS

The risk factors relating to an investment in the Company include those disclosed below. A complete list of the risk factors relating to an investment in the Company is disclosed in the Company's most recent Annual Information Form available at www.sedar.com or by contacting the Company by the means described above.

(a) Interest Rate Fluctuations

The market value of a unit may, at any given time, be affected by the level of interest rates prevailing at such time. An increase (decrease) in interest rates will, on its own, likely reduce (increase) the value of a preferred share, given that the dividends on such preferred shares are fixed.

(b) Fluctuations in Value of Brookfield Shares

The value of a unit will vary according to the value of the Brookfield shares. The value of the investment may be influenced by factors not within the control of the Company, including: the financial performance of Brookfield which may result in a decline in value of the investment portfolio and/or in dividend income from the investment, interest rates, general economic conditions, availability of equity and debt financing and financial market conditions.

(c) Foreign Currency Exchange Fluctuations

Brookfield's functional currency is the United States dollar and it declares dividends in that currency. Accordingly, changes in the exchange rate between the Canadian and United States currencies may impact the value of the Company's investment portfolio and cash flows relative to its financial obligations which are denominated principally in Canadian dollars.

RESULTS OF OPERATIONS

Total assets at June 30, 2014 were \$2,507 million compared to \$2,191 million as at December 31, 2013. The increase in total assets was the result of an increase in the market value of the Company's Brookfield shares which at June 30, 2014, was \$2,499 million compared to \$2,191 million at December 31, 2013, based on a Brookfield share price of \$47.01 (December 31, 2013 – \$41.22).

The Company's net assets as at June 30, 2014 were \$1,816 million, an increase from \$1,501 million at December 31, 2013, which was primarily the result of the increase in the market value of the Brookfield shares.

The Company's net assets on a per unit basis, which consists of one capital share and one preferred share, at June 30, 2014 was \$90.50 compared to \$79.08 at December 31, 2013. The increase in net assets per unit was driven primarily by the increase in the market value of the Company's Brookfield shares.

The Company paid total dividends during the six months ended June 30, 2014 of \$13.0 million to the holders of the senior preferred shares and \$nil to the holders of the capital shares (June 30, 2013 – \$13.0 million and \$67.5 million, respectively). The capital share dividends paid in the prior year period represented a special dividend of Brookfield Property Partners Limited Partnership units received from Brookfield and provided to the holders of the Company's capital shares.

In July 2014, following the closing of the Company's preferred share offering and the redemption of the Series 4 preferred shares (as discussed below), the Company paid a special cash dividend totalling \$69 million to the holders of its capital shares.

In July 2014, the Company completed a preferred share offering and issued \$200 million of Class AA Preferred Shares, Series 6 and redeemed \$125 million Class AA Preferred Shares, Series 4 which matured on July 9, 2014.

RELATED-PARTY TRANSACTIONS

The Company's operations are managed by Brookfield and Brookfield Investment Management (Canada) Inc., who are entitled to a management fee of up to 10% of ordinary expenses of the Company. For the period ended June 30, 2014, the Company paid management fees of \$15,000 (June 30, 2013 – \$15,000) plus applicable sales taxes.

(e) Revenue Recognition

Dividend income is recognized on the ex-dividend date and interest income is recognized as earned.

(f) Other Assets and Liabilities

Accounts receivable and cash are classified as loans and receivables and are accounted for at amortized cost. Accounts payable and other non-derivative liabilities are classified as other liabilities and are accounted for at amortized cost.

(g) Voting and Capital Shares

The Company's issued voting shares are classified as financial liabilities whereas the Company's capital shares are classified as equity in accordance with IAS 32.

(h) Foreign Currency Translation

The Company considers the Canadian dollar to be its functional currency as it is the currency of the primary economic environment in which the Company operates. Accordingly, monetary assets and liabilities denominated in foreign currencies are translated into Canadian dollars at the exchange rates in effect at the end of the reporting period and non-monetary assets and liabilities at the exchange rates in effect at the time of acquisition or issue. Revenues and expenses are translated at rates approximating the exchange rates in effect at the time of the transactions.

(i) Accounting Estimates

The preparation of the financial statements in accordance with IFRS requires estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

(IV) Future Changes in Accounting Standards

IFRS 9, *Financial Instruments* ("IFRS 9") was issued by the IASB on November 12, 2009 (with the final IFRS 9 issued in July 2014) and will replace IAS 39, *Financial Instruments: Recognition and Measurement* ("IAS 39"). IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2018. The Company has not yet determined the impact of IFRS 9 on its financial statements.

3. IFRS TRANSITION

The Company adopted IFRS in 2014 and is effective as of October 1, 2012. The Company prepared its opening IFRS balance sheet as of that date.

The Company previously prepared its financial statements in accordance with Canadian GAAP for all periods up to and including December 31, 2013. These financial statements for the semi-annual period ending June 30, 2014 are the Company's first financial statements that have been prepared in accordance with IFRS. This note explains the impact of the Company's transition to IFRS.

(I) Elected Exemptions from Full Retrospective Application

These financial statements have been prepared in accordance with IFRS 1. IFRS 1 permits certain optional exemptions from full retrospective application of IFRS. The Company has elected to use the optional exemption that permits it to designate a financial asset or liability as FVTPL at the date of transition. The Company has designated its investment in Brookfield shares as FVTPL. There was no impact to the value of the Brookfield shares in prior periods as a result of the exemption.

(II) Mandatory Exceptions to Retrospective Application

In preparing these financial statements in accordance with IFRS 1, the Company has applied certain mandatory exceptions from full retrospective application of IFRS. The mandatory exceptions applied from full retrospective application of IFRS are described below:

Estimates

The estimates previously made by the Company under Canadian GAAP are consistent with their application under IFRS.

(III) Significant Differences Between IFRS and Canadian GAAP

IFRS are premised on a conceptual framework similar to Canadian GAAP, however, significant differences exist in certain matters of recognition, measurement and disclosure. The adoption of IFRS has no impact on the cash flows generated by the Company, however, the adoption of IFRS resulted in the following changes to the reported financial position and results of operations:

Fair Value of FVTPL Securities

Under Canadian GAAP, the fair value of the Company's Brookfield shares were required to be determined with reference to a Bid or Ask price, as appropriate. Under IFRS, the Company has elected to determine the fair value of the Brookfield shares with reference to the quoted market price at the close of trading on the reporting date. This resulted in certain restatements of comparable balances.

Voting Shares and Capital Shares

Under Canadian GAAP, the Company's issued voting shares and capital shares were classified as equity. Under IFRS, the Company's issued voting shares are classified as financial liabilities whereas the Company's capital shares are classified as equity in accordance with IAS 32. This resulted in certain presentation differences in the financial statements.

(IV) Reconciliation of Equity as Reported Under Canadian GAAP to IFRS

The following is a reconciliation of the Company's equity reported in accordance with Canadian GAAP to its equity in accordance with IFRS:

8. FAIR VALUE OF FINANCIAL INSTRUMENTS

The fair value of a financial instrument is the amount of consideration that would be agreed upon in an arm's-length transaction between knowledgeable, willing parties who are under no compulsion to act. Fair value of the Company's investments are determined by reference to the closing price of the last day of trade at each financial reporting period.

Fair value hierarchical levels are directly determined by the amount of subjectivity associated with the valuation of these assets and liabilities and are as follows:

Level 1 – Inputs are unadjusted, quoted prices in active markets for identical assets or liabilities at the measurement date.

Level 2 – Inputs (other than quoted prices included in Level 1) are either directly or indirectly observable for the asset or liability through correlation with market data at the measurement date and for the duration of the instrument's anticipated life.

Level 3 – Inputs reflect management's best estimate of what market participants would use in pricing the asset or liability at the measurement date. Consideration is given to the risk inherent in the valuation technique and the risk inherent in the inputs used in determining the estimate.

The fair value hierarchical level associated with the Company's financial assets and liabilities measured at fair value consists of the following:

As at (Thousands)	June 30, 2014			December 31, 2013			October 1, 2012		
	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
Brookfield shares	\$ 2,499,082	\$ —	\$ —	\$ 2,191,281	\$ —	\$ —	\$ 1,802,146	\$ —	\$ —
	\$ 2,499,082	\$ —	\$ —	\$ 2,191,281	\$ —	\$ —	\$ 1,802,146	\$ —	\$ —
