MANAGEMENT'S REPORT ON FUND PERFORMANCE

The following Management's Report on Fund Performance for the six months ended June 30, 2024, is dated August 19, 2024.

This is a report on the performance of the Company and contains financial highlights but does not contain the complete financial statements of the Company. This report follows the disclosure obligations under National Instrument 81-106 Investment Fund Continuous Disclosure ("NI-81-106" or the "Instrument") and should be read in conjunction with the financial statements and notes thereto for the period ended June 30, 2024.

You can receive a copy of the Company's financial statements at your request and at no cost by calling (416) 363-9491, by writing to us at 181 Bay Street, Brookfield Place, Suite 100, P.O. Box 767, Toronto, Ontario M5J 2T3 or by visiting SEDAR+ at <https://www.sedarplus.ca/>. Security holders may also contact us using one of these methods to request a copy of the Company's proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure when that information becomes available.

INVESTMENT OBJECTIVE AND STRATEGIES

The Company's objective is to invest in Class A Limited Voting Shares of Brookfield Corporation (the "BN Class A Shares"), which generate cash flow through dividend payments that fund quarterly fixed cumulative preferential dividends for the holders of the Company's senior preferred shares and provide the holders of the Company's capital shares the opportunity to participate in any capital appreciation in the Brookfield Shares. The Company's capital shares and preferred shares are also referred to collectively as units, with each unit consisting of one capital share and one preferred share.

RISKS

The risk factors relating to an investment in the Company include those disclosed below. A complete list of the risk factors relating to an investment in the Company is disclosed in the Company's most recent Annual Information Form available at www.sedarplus.ca/ or by contacting the Company by the means described above.

(a) Interest Rate Fluctuations

The market value of a unit may, at any given time, be affected by the level of interest rates prevailing at such time. An increase (decrease) in interest rates will, on its own, likely reduce (increase) the value of a preferred share, given that the dividends on such preferred shares are fixed.

(b) Fluctuations in Value of Brookfield Shares

The value of a unit will vary according to the value of the Brookfield Shares. The value of the investment may be influenced by factors not within the control of the Company, including: the financial performance of Brookfield which may result in a decline in value of the investment portfolio and/or in dividend income from the investment, interest rates, general economic conditions, availability of equity and debt financing and financial market conditions.

(c) Foreign Currency Exchange Fluctuations

The Company's Brookfield Shares are held primarily in United States dollars and Brookfield's dividends are declared in that currency. The Company pays its preferred share distributions in Canadian dollars, which are then converted to U.S. dollars for the purposes of financial reporting, changes in the exchange rate between the Canadian and United States currencies may impact the value of the Company's cash flows relative to its financial obligations, which are denominated principally in Canadian dollars.

RESULTS OF OPERATIONS

Total assets and net assets at June 30, 2024, were \$6.1 billion and \$5.3 billion, respectively, compared to \$6.0 billion and \$5.1 billion as at December 31, 2023.

The Company's net assets on a per unit basis as at June 30, 2024, was \$128.34 compared to \$124.10 at December 31, 2023. The increase in net assets per unit was driven primarily by the appreciation in the market value of our investment in Brookfield Corporation (the "Corporation", NYSE/TSX: BN), partially offset by the depreciation in market value of our investment in Brookfield Asset Management Ltd. (the "Manager", NYSE/TSX: BAM) over the same period. The Corporation share price was \$41.54 as at June 30, 2024 (December 31, 2023 – \$40.12) and the Manager share price was \$38.05 as at June 30, 2024 (December 31, 2023 – \$40.17).

Income available for distribution for the six-months ended June 30, 2024, was \$42 million, compared to \$37 million in the prior year period. The increase in income was primarily attributable to the increase in the dividend rate by the Corporation and the Manager. During the six months ended June 30, 2024, the Company declared and paid dividends in the amount of \$30 million (June 30, 2023 – \$50 million) to the holders of its capital shares.

Fair value of the Company's investments are determined by reference to the closing price of the last day of trade at each financial reporting period.

Fair value hierarchical levels are directly determined by the amount of subjectivity associated with the valuation of these assets and liabilities and are as follows:

- Level 1 Inputs are unadjusted, quoted prices in active markets for identical assets or liabilities at the measurement date.
- Level 2 Inputs (other than quoted prices included in Level 1) are either directly or indirectly observable for the asset or liability through correlation with market data at the measurement date and for the duration of the instrument's anticipated life.
- Level 3 Inputs reflect management's best estimate of what market participants would use in pricing the asset or liability at the measurement date. Consideration is given to the risk inherent in the valuation technique and the risk inherent in the inputs used in determining the estimate.

There were no changes made to the financial instrument classifications and no transfers in and out of levels during the period. The fair value hierarchical level associated with the Company's financial assets and liabilities measured at fair value consists of the following:

As at (Thousands of US dollars)	June 30, 2024			December 31, 2023
